DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-4 and 41 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claims 1 and 3, the phrase “non-adjustably/non-adjustable position” presents an ambiguity in that the structure “hand releasably” mates with the leveler, this function suggesting some sort of adjustment of conditions and/or positions of the leveler attachment structure with respect to the ladder leveler. Note that the applicant has failed to define the type of non-adjustable movement (or location thereof) to exclude a hand releasable mating with the leveler as the claim states.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 and 41 are rejected under 35 U.S.C. 102(b) as being anticipated by King #5,704,451. King discloses a ladder leveler assembly, as best seen in Figures 5 and 6, comprised of a ladder 12, a ladder leveler (lower portion of Figure 6) *having static portions 32, 34, 36*, a

leveler attachment base/plate 20, a *hand releasable* leveler attachment structure/movable latch/locking device/mating structure 64 *that can be fixed in a specific position*, a locking pin 72, which is received within a slot/attachment surface (unnumbered), catchment surfaces 36 that allow the leveler to be placed in at least 6 vertically displaced positions, and safety locks/pins/bolts 22.

Allowable Subject Matter

Claims 5-39 are allowed.

Claim 40 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The primary reason for the allowable subject matter of claim 40, is the inclusion of the locking pin mounted to the static portion of the leveler. For claims 5, 16, and 27, the reasons for allowance is the inclusion of the leveler mating structure of the base having two mating surfaces (leveler attachment surfaces) that restrain the leveler attachment structure against movement in five of the six directions and the catchment surface that restrains the leveler attachment structure against movement in the sixth direction. The prior art of record fails to teach or suggest the claimed features absent the applicant's own disclosure.

Response to Arguments

Applicant's arguments with respect to claims 1-4 and 40 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Specifically, the applicant now recited the leveler having a static portion and a non-adjustable/hand releasable mating of the mating structure. See claims 1 and 3. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
